## E-DICIONÁRIO DE VERBOS PARA ESTUDANTES BRASILEIROS DA EDUCAÇÃO BÁSICA

Alex Sandro da Silva Polizer

Orientadora: Dra. Regiani Aparecida Santos Zacarias

# OBJETIVO GERAL

O objetivo geral deste produto foi elaborar a nova edição do “e-Dicionário de Verbos Português/Inglês”, com 238 verbos, sendo 138 verbetes inéditos de verbos da letra “C”. O e-DEVPI é um dicionário *on-line* e de fácil acesso, no qual, o aluno encontra informações sobre os verbos nas formas afirmativa, negativa e interrogativa, no tempo presente, passado e futuro (simples, perfeito e contínuo).

# OBJETIVO ESPECÍFICO

Elaborar 138 verbetes inéditos da letra “C” para o e-DEVPI cumprindo as seguintes etapas

- ◆ Selecionar os verbos da letra “C” mais frequentes na língua portuguesa apontados na obra de Bay e Davies (2008) e confirmados no site: <http://www.sketchengine.co.uk/>
- ◆ Analisar cada verbo no dicionário monolíngue português, Dicionário Aurélio, disponível na forma *on-line*;
- ◆ Redigir o e-verbete dando conta de sua totalidade: acepções, aspectos gramaticais, aspectos culturais. Para isso foram utilizados os dicionários escolares português/inglês: Longman, Oxford, Michaelis e Collins;
- ◆ Organização de uma tabela com os equivalentes encontrados nos quatro dicionários bilíngues para um determinado verbo;
- ◆ Para a validação dos equivalentes, passamos a analisar as acepções que os dicionários bilíngues traziam, para tanto, utilizamos a verificação com a conferência em dois dicionários monolíngues do inglês consultados *online*: *Oxford Dictionary* e *Merriam-Webster Dictionary*;
- ◆ Redação e elaboração de cada verbete.

# METODOLOGIA

A pesquisa teve como metodologia na primeira etapa, a abordagem quantitativa porque quantifica um número de verbos que serão trabalhados na elaboração de e-verbetes e qualitativa porque realiza uma análise das informações fornecidas em quatro dicionário bilíngues e um dicionário monolíngue. Pode ser considerada, também, uma abordagem exploratória descritiva porque explora os dicionários selecionados para descrever informações fornecidas por eles. Na segunda etapa, o desenvolvimento foi por meio da redação de verbetes. O resultado foi a elaboração de e-verbetes diferenciados e voltados para atender às necessidades dos consulentes aprendizes.

# AVALIAÇÃO DOS RESULTADOS

Os resultados foram obtidos por meio de uma análise de um modelo de e-verbete realizado com cinco professores de Língua Inglesa de escolas públicas e particulares. Para participar da pesquisa os professores assinaram o termo de consentimento. Em seguida, receberam por *e-mail* uma apresentação de slides do e-verbete “carregar”. Os slides apresentaram fotos das acepções apresentadas pelo e-verbete e expressões de uso. Após analisar o e-verbete, os cinco professores receberam um *link* para ter acesso ao questionário, realizado pelo *Google Forms* e composto por oito perguntas, sete para responder com Sim ou Não e uma pergunta aberta para expressar sua própria opinião, dando sugestões, dicas ou apontando falhas do e-verbete.

Para cada uma das questões, obtivemos 100% de satisfação dos professores em relação ao modelo de e-verbete apresentado.
